PROBLEM STATEMENT

Students currently lack a centralized platform to effectively showcase their academic achievements, skills, and projects. Their work is often scattered across different tools, making it hard to track progress, reflect on learning, or present themselves to educators and future employers. A digital student portfolio system is needed to organize, display, and share their work in a structured and accessible way.

PROJECT OVERVIEW

The Student Portfolio System is a digital platform that allows students to organize, manage, and showcase their academic work, projects, and achievements. It helps students track progress, reflect on learning, and share their portfolios with teachers or future employers in a professional format.

WHO ARE THE END USERS?

Students – Create and manage portfolios

Teachers – Review and assess work

Administrators – Monitor student progress

**Employers/Universities – Evaluate skills
and achievements**
